KELSEY'S

**Hardy American Plants
Azaleas, Rhododendrons
Specimen Evergreens
Carolina Mountain Flowers**

The Carolina Hemlock (*Tsuga caroliniana*)

This grand new species is now universally accepted as the "Queen of American Evergreens." Introduced by Highlands Nursery in 1884, it has become known to tree-lovers as the most distinctive and graceful of all conifers which are **hardy throughout the entire United States.**

Its dense, dark foliage, sweeping, semi-pendulous branches, and eventually pyramidal form combine to give a charm not found in any other evergreen known to cultivation. It is much hardier and more adaptable to city atmospheres than its plainer sister, the Canadian Hemlock, and will also thrive in southern latitudes where the latter becomes thin, yellow, and unsightly.

It is the "coming Evergreen" for the finest landscape plantings, either as single specimens or for mass effects and backgrounds. A splendid stock of young plants up to 2 feet is now ready. Also a limited number of specimens 6 to 10 feet, and at Highlands Nursery some grand specimens 16 to 20 feet. Prices, see pages 9 and 22.

• Boxford Nursery: BOXFORD, MASS.
Highlands Nursery: PINEOLA, NORTH CAROLINA
3,800 feet elevation

Information

BOXFORD NURSERY (East Boxford P. O.) is located 28 miles north of Boston, at Boxford Station, on the Georgetown Branch, B. & M. R. R. Good automobile roads lead in all directions. Distances from Nursery to Boston, 28 miles; Salem, 14 miles; Lawrence, 11 miles; Haverhill, 9 miles; Newburyport, 10 miles; Manchester, 13 miles; Ipswich, 9 miles; Lowell, 20 miles.

Visitors are always welcome, and customers will find pleasure and a distinct advantage in personally inspecting material. Mr. Kelsey will be glad to meet prospective customers at the Nursery by appointment. A visit during Rhododendron, Kalmia, and Azalea blooming season is an event really worth while.

HIGHLANDS NURSERY, Pineola, western North Carolina, is located at 3,800 feet elevation, on the crest of the Blue Ridge Mountains. Here many of our choicest new American plants have been grown and introduced for the first time to cultivation, including **Carolina Hemlock**, **Azalea vaseyi**, **Rhododendron carolinianum**, **Lilium grayi**, **Shortia galacifolia**, **Robinia kelseyi**, and many others. From here also we ship "collected" Rhododendrons and Kalmias in carload lots, of a grade far superior to Pennsylvania "collected" material. "Collected" Rhododendron entawbiense (true) comes only from our high southern mountains.

AMERICAN NATIVE PLANTS. Specialties at both Nurseries are Hardy American Plants, which must always be the basis of all successful permanent plantings, and **Specimen Evergreens**. We have thousands of the choicest conifers up to 20 feet in height, Rhododendrons 4 to 5 feet in diameter; Azaleas in splendid clumps, heavily budded; and Dwarf Evergreens for immediate effect in Rockwork and Borders. We are the first and still the largest growers of American Native Ornamentals.

EMBARGO ON FOREIGN STOCK. The Federal Horticultural Board has proclaimed a complete embargo on all Foreign Trees and Shrubs and practically all Herbaceous Plants. This means a distinct horticultural advance in America, for Americans must now learn that our Native Trees and Plants are hardier, freer from disease, more permanent, and far more beautiful and "fitting" in our landscapes and home grounds than exotic material. The best exotics can and now will be grown in America for Americans. We are growing them by thousands.

SHIPPING SEASON begins in August for Rhododendrons, Kalmias, Conifers and many herbaceous plants, general stock going out from September to December. Spring shipments usually from March to June.

SHIPPING INSTRUCTIONS should be given, otherwise I use my best judgment, but assume no risk. All shipments travel at consignee's risk and carriers must be held liable for damage in transit.

DELIVERY BY TRUCK. Where the size of order warrants, there are distinct advantages in auto truck delivery for distances up to 30 to 50 miles. Stock arrives quickly and when wanted is delivered fresh on the grounds and saves local trucking and unpacking. Charges are made according to size of truck and distance traveled.

PRICES are made to fit the quality of stock sent out. Discriminating buyers now realize that the greatest value of nursery stock is *underground*. Frequent transplanting, and handling specimens with adequate, burlaped balls, mean success and quick results. It costs more, but it is the fixed policy of the Boxford Nursery, and "cheap" stock will not be handled or sent out. The best is always the cheapest.

SPECIAL SELECTION. Stock selected by customers at Nursery or specially selected stock ordered by mail or otherwise will be charged at advanced prices to fit the value of stock selected. The prices in this catalogue cover the average good grade as they run in the nursery row.

PACKING CHARGES. At prices printed in this catalogue, Boxing, Baling, or Burlaping is free, except where noted. Where small sizes or deciduous stock is balled and burlaped by special request, a charge is always made to cover cost. See page 24 for Burlaping charges.

TERMS. Cash or satisfactory reference from unknown customers. All accounts are due the first of each month, unless by special arrangement. 5 at 10 rate; 50 at 100 rate; 500 at 1,000 rate.

NON-WARRANTY. No guarantee, express or implied, is made that stock will grow, whether planted by me or otherwise. Having no control over after treatment of plantings or over weather conditions, it is obvious that purchaser must assume all responsibility after stock leaves the Nursery in good condition. However, under certain conditions, I am prepared to guarantee plantings made by me covering a specified period, on an insurance basis. Charges will be made according to risk involved and value of material. Claims for errors must be made on receipt of goods. If there is any mistake or fault on my part it will gladly be rectified.

PLANT NAMES. The botanical (scientific) names of Trees, Shrubs, and Woody Vines in this catalogue conform to the 1917 Official Code of Standardized Plant Names, adopted and published by The American Joint Committee on Horticultural Nomenclature, as first printed in L. H. Bailey's "Standard Cyclopedia of American Horticulture," Vol. VI, 1917.

DESCRIPTIVE CATALOGS, illustrated, are mailed on request, and advice on the right way to grow Rhododendrons, Azaleas, and other native plants is gladly given.

LANDSCAPE FORESTRY. Evergreen seedlings and transplants in large quantities are grown at both nurseries in the choicest species. We do Landscape Forestry, treating woodlands from a **landscape standpoint** as well as for commercial uses. Mr. Kelsey is open for consultations and engagements. Always address,

KELSEY'S HARDY SPECIMEN EVERGREENS

CATALOG OF BOXFORD NURSERY

Abies fraseri

Prices at Boxford Nursery

NOTE: All stock transplanted and nursery-grown unless marked otherwise. "S."—Seedlings. "Col."—Collected.

The larger sizes of Evergreens are always shipped with balls, and burlaped.

The prices in this list cover the average good grade as they run in the nursery row. Where specimens are poked, a price will be made to fit the specimen.

Evergreen Trees and Shrubs

Write for special prices on young seedlings and transplanted Evergreens by the thousand, such as White and other Pines, Firs, Spruces, etc.

	Each	10	100
<i>Abies arizonica</i> . SILVER CORK FIR. 6 to 7 ft. . .	\$10 00

4 to 5 ft.	7 00		
5 to 16 ft. specimens.	\$8 to 125 00		

fraseri. FRASER'S FIR. A distinct species from the highest peaks of the Carolina mountains; makes a perfect specimen lawn and screen tree, with dark green, thick-set foliage (blue underneath) and compact, pyramidal habit. It is one of the choicest of all American conifers of the Fir section, not to be compared with the northern species, *Abies balsamea*, which is almost worthless in any but the latitude of middle and northern Maine, as it becomes "leggy," thin, and is short-lived. An unusually fine lot of this splendid Fir. The attention of nurserymen is particularly called to the *Abies fraseri* as the best Fir of this type that is grown in this country. The sizes listed below are especially bushy and well-rooted. It seems perfectly at home in the South, thriving where few other evergreens of this class can be grown with success. There are few evergreens we can recommend so highly.

KELSEY'S *Hardy American Plants* *Rhododendrons and Azaleas*

communis depressa . PROSTRATE JUNIPER. The best prostrate form of Juniper for ground-cover. It is at home on sandy or gravelly hill-sides, fully exposed to the sun, where single plants often reach a diameter of 15 feet or more. In shade it does well where other shrubs or grass will not thrive, forming a looser covering, however, than in the opening. It varies in form from the completely prostrate type to the ascending type, 2 to 4 feet high.

virginiana . RED CEDAR. 15 to 60 ft. Pyramidal habit; dark green to bluish foliage, with many variable forms. This is one of the most useful and characteristic trees of our native landscapes. It rivals the Italian Cypress in beauty, is absolutely hardy, and stands sea exposure well. Fruit dark blue and conspicuous, hanging until mid-winter. For many effects it is the most useful evergreen for northern latitudes. This is a specialty at Boxford Nursery, and we can supply trees up to 30 feet. We have made many notable plantings of large Cedars with uniform success.

Kalmia angustifolia. DWARF LAUREL 6 to 12 in. 50 4 00			
latifolia. THE MOUNTAIN LAUREL. One of the grandest of our native, broad-leaved, evergreen shrubs, attaining tree-like proportions in our southern mountains. In cultivation it is a broad, thick shrub, and, when in full bloom, of surpassing beauty. The wheel-shaped flowers in close terminal corymbs, pure white to pink, appear in May or June in such profusion as almost to smother the foliage. Its thick, shiny leaves, conspicuous the year round, make it a shrub of greatest value for massing. The hardiness of <i>Kalmia latifolia</i> is beyond doubt, it being found sparingly in Nova Scotia and increasingly in abundance through New England and the middle Atlantic states (particularly in the higher altitudes), till the crest of the southern Alleghenies is reached. Here the true American home of the broad-leaved Ericaceae and perfect conditions of soil and climate are found, producing such luxuriance of growth as to form veritable jungles of gorgeous beauty, miles in extent. It is found throughout South Carolina, Georgia, and northern Florida, along the banks of streams and cypress swamps. This proves it to be a plant that will stand almost semi-tropical conditions as well as extreme cold. It is therefore extremely valuable for the southern states, taking its place with the magnificent Indian Azaleas, which are not hardy in the North. For prices of "collected" <i>Kalmia</i> clumps by the earload see page 24.

Lencothoe catesbaei. LEUCORHOE. 3 to 8 ft. Few shrub evergreens of the broad-leaved sort have the grace of this one. The thick, shining green leaves are evenly disposed on long, recurved branches, with dense racemes of beautiful, white, bell-shaped flowers. As an under-shrub or for banks and the borders of streams it is without a rival. As an edging and "finish" for the "Rhododendron bed" it is indispensable, and should be used freely for best effect. The sprays make beautiful winter decorations indoors, turning a rich bronzo in the fall where exposed to the sun. My stock of this broad-leaved border plant comprises thousands of specimens in all sizes up to 2½ feet in diameter.

Rhododendron carolinianum. A new American species. Clear pink. Absolutely hardy. This is one of our finest introductions and fills a long-felt want for a hardy dwarf Rhododendron with flowers free from any hint of magenta. It was described and named by Alfred Rehder, of the Arnold Arboretum. It is the smallest Alleghanian species, attaining a height of 6 to 8 feet in cultivation. The thick-set leaves are dark green, usually blunt and narrow, covered with rusty dots below, much smaller than either Maximum or Catawbiense. Flower-clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hillsides, standing exposure unusually well and invaluable as a single specimen or for massing.

catawbiense. Of the Carolina mountains. The hardiest of all Rhododendrons. It was this magnificent Rhododendron that over a hundred years ago was introduced into Europe, supplying, together with *Rhododendron maximum*, color and hardy blood to the cultivated "hybrids," but with a consequent loss of hardiness; and so today, for American gardens, where ironclad hardiness is essential, we must turn to the true original species, found on the loftiest, coldest peaks of the southern Alleghanies, where it attains a height of 20 to 30 feet. Considering the extreme hardiness, color of flower, compact growth, and remarkable texture of foliage, which is a deep, shining green, and far superior to the better-known *Rhododendron maximum*, we can recommend the true native Catawbiense as the finest for general use, withstanding exposure and extremes of temperature where other Rhododendrons fail. Unlike *Rhododendron maximum*, it is a very free bloomer, with foliage of a dark, rich, lasting green, which never rusts. The trusses are a bright red-purple (in marked contrast to the muddy purple of the semi-hardy, half-bred imported variety), and as sent out by Highlands Nursery is always on its

Hardy American Azaleas.

The American Azaleas are among the choicest of all ornamentals, whether exotic or native, and were but rarely seen in cultivation before being disseminated by Highlands Nursery.

They are seen at their best when planted in large masses and in properly prepared beds, and they richly repay any unusual care given them. Like most ericaceous plants, they love deep, moist, well-drained soil, and these showy native species are particularly adapted to planting in shrub borders and with Rhododendrons, their brilliant blossoms being set off by a background of dark foliage. Azaleas can be successfully grown almost anywhere, following same instructions given for Rhododendrons. The complete hardiness of all the species we offer is unquestionable. No American shrubs equal the native Azaleas, particularly *Azalea lutea*, for woodland and hillside plantings.

Our cold Carolinn mountains have added no more beautiful plants to gardens than these American Azaleas, not even excepting the magnificent broad-leaved evergreen Rhododendrons of world-wide fame.

Azalea arborescens. FRAGRANT WHITE AZALEA. 5 to 15 ft. In June the delightfully spicy fragrant white flowers, with pink stamens, appear in profusion, lasting for weeks. Becomes n spreading clump 3 to 6 feet broad in cultivation; easy culture. The foliage of this variety often colors striking shades of red in late autumn, and is the best of all the genus. The clumps offered have from twenty-five to one hundred stems and are heavily budded with enormous balls.

lutea (calendulaea). GREAT FLAME AZALEA. 6 to 15 ft. The most regal of all the species, native or exotic, and a noble representative of our rich Carolina mountain flora. Bartram, speaking of it in his "Travels," calls it the "fiery Azalea," and says: "This epithet 'fiery' I annex to this most celebrated species of Azalea as being expressive of the appearance of its flowers, which are in general of the color of the finest red lead, orange, and bright gold as well as yellow and cream-color. This is certainly the most gay and brilliant-flowering shrub yet known." No more striking landscape effect can be produced than a hillside of *Azalea lutea* in full bloom. Nearly all quoted above 18 inches are budded. These *Azalea lutea* are splendid clumps, with a mass of buds, and range in color from light sulphur-yellow to deep red. Where the colors are picked, a special charge will be made.

vaseyi. SOUTHERN AZALEA. 6 to 15 ft. This showy Azalea was discovered only as late as 1878, and introduced by Highlands Nursery very soon after. It is of easy culture, and is perhaps the most profuse bloomer of all the native species, and the more conspicuous, as its white, pink, or deep rose-colored flowers appear in early April or May before the foliage. Of erect, slender habit, naturally, in cultivation, it becomes more spreading, while retaining the charming light stem-growth. Autumn usually turns the leaves a deep dark crimson, greatly enhancing its beauty and value.

SALIX. Our collection of Willows covers almost all the species that are planted in the Arnold Arboretum, and we have others in smaller quantities that have lately been discovered in China and elsewhere. Many of the Willows are charming dwarf and semi-prostrate shrubs, notably beautiful, with bright yellow, brown, and green branchlets, or sometimes covered with a white bloom. The catkins are extremely showy and range from tiny balls of down to golden yellow spikes. Most of them thrive well in both dry soils and in very moist locations.

	Each	10	100
<i>acutifolia</i> . 15 to 25 ft. Branchlets dark-colored, covered with bloom; long, narrow leaves.	\$0 40	\$3 20	
3 to 4 ft.	00	4 00	\$36 00
5 to 6 ft.	60	4 00	
<i>alba</i> . WHITE WILLOW. Large tree. 3 to 4 ft.	80	7 20	60 00
4 to 6 ft.			
<i>alba calva</i> . Tree to 50 feet, with bluish green, smooth foliage. Pyramidal habit. 3 to 4 ft.	40	3 20	
4 to 5 ft.	00	4 00	
<i>alba splendens (regalis)</i> . ROYAL WILLOW. 30 to 60 ft. Very rich silvery foliage; fine as a single specimen or in groups. 4 to 5 ft.	60	4 00	36 00
6 to 8 ft.	75	6 00	50 00
<i>ambigua</i> . 2 to 3 ft. With creeping stems; smooth branchlets; fine sort. 1 to 2 ft.	40	3 20	
<i>austriaca (grandifolia × purpurea)</i> . Tall shrub or small tree, with medium-sized broad- ish leaves, grayish below. 2 to 3 ft.	40	3 20	
4 to 5 ft.	00	4 00	
<i>babylonica var.</i> From China. 40 to 60 ft. Wavy bright green foliage; very pendulous branches. 3 to 4 ft.	1 00		
<i>blanda</i> . WISCONSIN WEEPING. Medium tree. Glaucous foliage. 4 to 5 ft.	60	5 00	
<i>cinerea</i> . 15 to 25 ft. Tomentose branchlets; leaves downy on both sides. 2 to 3 ft.	40	3 20	24 00
5 to 6 ft.	75	6 00	50 00
<i>cordata</i> . Shrub to 15 feet, with long leaves and conspicuous catkins in spring. 1 to 2 ft.	40	3 20	
2 to 3 ft.	60	5 00	
4 to 5 ft.	80	7 20	
<i>elegantissima</i> . THURLOW'S WEEPING WILLOW. 40 to 60 ft. Rapid growth; one of the best of the pendulous forms. 2 to 3 ft.	30	2 40	20 00
3 to 4 ft.	50	4 00	32 00
<i>erdingeri cremensis</i> . Tall shrub; broad leaves, pubescent. 5 to 6 ft.	75	6 00	
<i>fragilis bullata</i> . Tall shrub of compact habit, with large, smooth leaves. 1 to 2 ft.	30	2 40	
3 to 4 ft.	60	5 00	
<i>fragilis var.</i> Tall shrub with rather narrow, smooth leaves. 2 to 3 ft.	40	3 20	
3 to 4 ft.	60	5 00	
<i>glaucophylla</i> . Shrubby; striking thick foliage; one of the best. 2 to 3 ft.	60	5 00	
3 to 4 ft.	80	7 20	
<i>gracilistyla</i> . Fine. Shrub; young branchlets tomentose; older reddish brown; acute leaves; large catkins appearing earlier than those of any other willows. 1 to 2 ft.	40	3 20	24 00
3 to 4 ft.	60	5 00	
<i>grandifolia</i> . Shrub to 10 feet with rather large, broad leaves, bluish below.	40	3 20	
1 to 2 ft.			
<i>hastata, female</i> . Shrub to 6 feet. Young branch- lets pubescent; older brown; serrate leaves. 1 to 2 ft.	40	3 20	
2 to 3 ft.	60	5 00	
<i>incana</i> . A tall shrub or tree to 30 feet. 12 to 18 in. 2 to 3 ft.	40	3 20	
	60	5 00

<i>latifolia</i> (caprea × myrsinifolia). Tall shrub or small tree with rather broad, medium-sized leaves. 1 to 2 ft.	40	3 20	
2 to 3 ft.	60	5 00	
<i>lucida</i> . Tall shrub or tree to 20 feet, with large shiny long-pointed leaves; male catkins late, golden yellow; very handsome. 2 to 3 ft.	40	3 20	\$24 00
3 to 4 ft.	60	5 00	
<i>ludificans</i> . Shrubby, smooth leaves, glaucous beneath. 2 to 3 ft.	40	3 20	
<i>myrsinifolia</i> . Shrubs up to 12 feet. Broad, acute leaves, glabrous above and woolly underneath. 2 to 3 ft.	40	3 20	
4 to 5 ft.	60	5 00	
5 to 6 ft.	80	7 20	
<i>myrtilloides</i> , female. 2 to 3 ft. Shrub or tree; very showy foliage. 3 to 4 ft.	60	5 00	40 00
4 to 5 ft.	80		
<i>nerifolia</i> (purpurea × grandiflora). 3 to 6 feet. Shrub; young branchlets pubescent, later smooth green or brown. 2 to 3 ft.	60	5 00	
<i>pentandra</i> . LAUREL-LEAVED WILLOW. 40 to 60 feet. Shiny foliage; rapid grower. 1 to 2 ft. ...	30	2 40	20 00
2 to 3 ft.	40	3 20	
4 to 6 ft.	60	5 00	40 00
6 to 8 ft.	1 00	8 00	
<i>petiolaris</i> . Shrub to 10 feet, with narrow leaves. 3 to 4 ft.	60	5 00	
4 to 5 ft.	80	7 20	
<i>phyllicifolia</i> . 3 to 5 feet. Branchlets smooth; polished, glossy foliage. 12 to 18 in.	40	3 20	24 00
3 to 4 ft.	60	5 00	
<i>phyllicifolia crowiana</i> . Shrub to 5 feet, with stout branches and rather broad leaves, whitish below. 1 to 2 ft.	40	3 20	
<i>piperi</i> . Shrub to 20 feet; dark brown branchlets; large leaves. 3 to 4 ft.	40	3 20	
<i>purpurea</i> . Shrub or small tree to 15 feet, with slender purple branches, and rather small, narrow leaves. Much used for fine basket-work abroad. 3 to 4 ft.	40	3 20	
4 to 5 ft.	60	5 00	
<i>purpurea amplicaulis</i> . Small tree. Similar to <i>S. purpurea</i> , but leaves broader. 1 to 2 ft. ...	00	5 00	
<i>purpurea kecksi</i> . Little different from <i>S. purpurea</i> . 4 to 5 ft.	40	3 20	
6 to 7 ft.	80	7 20	
<i>purpurea lambertiana</i> . PURPLE OSIER. Shrub or small tree with slender purple branches. 2 to 3 ft.	40	3 20	24 00
3 to 4 ft.	60	5 00	
4 to 5 ft.	80	7 20	60 00
5 to 6 ft.	1 00	8 00	
<i>purpurea sericea</i> . Small tree. Similar to <i>S. purpurea</i> but leaves silky. 3 to 4 ft.	40	3 20	
4 to 5 ft.	60	5 00	
<i>repens</i> , female. Fine dwarf procumbent species. 2 to 3 ft.	60	5 00	
3 to 4 ft.	80	7 60	
<i>repens argentea</i> . Dwarf shrub with small silvery white leaves. 12 to 18 in.	60	5 00	
<i>routori</i> (daphnoides × ekeagnus). Tall shrub; older branchlets brown and often covered with bloom; narrow dark green leaves. 3 to 4 ft.	60	5 00	
<i>rubens</i> . Tree with fragile branches; a hybrid between <i>S. alba</i> and <i>S. fragilis</i> . 2 to 3 ft.	30	2 40	
4 to 5 ft.	60	5 00	40 00
5 to 6 ft.	80	7 60	
<i>rubens palustris</i> . Tree with fragile branchlets. 2 to 3 ft.	40	3 20	
4 to 5 ft.	60	5 00	
<i>rubra</i> . Small shrub. 2 to 3 ft.	40	3 20	
Russian Golden . Medium tree. 2 to 3 ft.	30	2 40	20 00
3 to 4 ft.	40	3 20	24 00
<i>sericea</i> . One of the best dwarf species. 1 to 2 ft.	40	3 20	24 00
2 to 3 ft.	60	5 00	
<i>sosquiteria</i> . Low shrub. 2 to 3 ft.	60	5 00	
<i>stiboldiana</i> . Upright shrub; young branchlets tomentose, older glabrous; fine dark green foliage, white underneath. 1 to 2 ft.	30	2 40	
2 to 3 ft.	40	3 20	
3 to 4 ft.	60	5 00

Price-List of Highlands Nursery

SPECIAL NOTICE

Highlands Nursery, Pineola, North Carolina, lies on the crest of the Alleghany Mountains, at 3,800 feet elevation, insuring absolutely hardy stock. It is the native home of the most beautiful and hardiest Broad-leaved Evergreens and Ericaceous plants indigenous to America.

Labor conditions and lack of adequate shipping facilities have made it seem best to close out this nursery. Much of the best material is already growing at my Boxford Nursery where soil and a vigorous New England climate combine to produce well-nigh perfect conditions for propagating these fine things.

It is an excellent opportunity to secure fine material at prices that will probably not be duplicated again. Those wishing car-lots will do well to correspond with me at once and secure very special rates.

For our customers who may wish "collected" Rhododendrons and Kalmias we will still continue to handle these direct from the high southern mountains. See page 24.

DECIDUOUS AND EVERGREEN Trees, Shrubs, Woody Vines

NOTE.—All plants are transplanted and nursery-grown, unless plainly marked otherwise. This is a catalog of nursery-grown plants growing at my Highlands Nursery, Pineola, North Carolina.

All communications should be addressed: Harlan P. Kelsey, Owner, Salem, Massachusetts.

CATALOG OF HIGHLANDS NURSERY

Rhododendrons and Mountain Laurel

"COLLECTED" CLUMPS BY THE CARLOAD

For the area covered and effect produced, a carload of Rhododendrons or Kalmias is the cheapest landscape proposition offered. I ship an unusual grade of splendid clumps, each plant a specimen and burlaped separately. Don't accept cheap stock, thrown into cars without burlaping, and the fine hair-like rootlets inevitably exposed. You will be disappointed and find it expensive in the end. While fine results may be had from "collected" Rhododendrons, particularly if purchased from a reliable source, where greatest care is used in digging and handling, results are never so sure as when nursery-grown stock is used.

The number that may be shipped in a car varies largely, depending on sizes. The minimum weight allowed per car is 16,000 pounds.

"Mixed" cars of collected *Rhododendron catawbiense*, *Rhododendron maximum*, and Kalmias will be sent if desired.

A car may be easily loaded much heavier, with proportionate increased freight charge.

A full car travels with greater safety than one with a small load.

All "clumps" offered below are collected with a good ball and are burlaped separately.

On collected clumps burlaping is always charged extra as below. We always burlap clumps unless expressly ordered otherwise.

PRICES OF "COLLECTED" CLUMPS OF RHODODENDRONS AND KALMIAS

Rhododendron catawbiense.	10	100	1,000
1 to 2 ft., "collected" clumps.....	\$12 00	\$100 00	\$900 00
2 to 3 ft., "collected" clumps.....	18 00	160 00	1400 00
3 to 4 ft., "collected" clumps.....	30 00	260 00	2200 00
4 to 5 ft., "collected" clumps.....	40 00	360 00	
Rhododendron maximum. THE GREAT AMERICAN ROSEBAY.			
1 to 2 ft., "collected" clumps.....	\$10 00	\$88 00	\$800 00
2 to 3 ft., "collected" clumps.....	14 00	120 00	1000 00
3 to 4 ft., "collected" clumps.....	22 00	200 00	1800 00
4 to 5 ft., "collected" clumps.....	36 00	320 00	
5 to 6 ft., "collected" clumps.....	60 00	480 00	
6 to 7 ft., "collected" clumps.....	76 00	600 00	
Kalmia latifolia. MOUNTAIN LAUREL.			
1 to 2 ft., "collected" clumps.....	8 00	76 00	680 00
2 to 3 ft., "collected" clumps.....	14 00	120 00	1000 00
3 to 4 ft., "collected" clumps.....	22 00	200 00	1800 00

CARLOADS IN MIXED SIZES

Rhododendron catawbiense, "collected" clumps.	
Car containing 200 clumps, 1 to 3½ ft., for.....	\$280 00
Car containing 300 clumps, 1 to 3½ ft., for.....	380 00
Car containing 400 clumps, 1 to 3½ ft., for.....	500 00
Car containing 600 clumps, 1 to 3½ ft., for.....	660 00
Rhododendron maximum, "collected" clumps.	
Car containing 300 clumps, 1½ to 4 ft., for.....	\$320 00
Car containing 400 clumps, 1½ to 4 ft., for.....	420 00
Car containing 600 clumps, 1½ to 4 ft., for.....	600 00

BURLAPING

Burlaping of "collected" Rhododendrons, Kalmias or other "collected" stock is charged for as per schedule below. Also where small sizes or deciduous stock is balled or burlaped by special request a charge is always made to cover cost.

Schedule of Burlaping Charges

	Eac
Small sizes.....	\$0 10
2 to 3 ft., clumps and trees.....	15
3 to 4 ft., clumps and trees.....	20
4 to 6 ft., clumps and trees.....	25
6 to 8 ft., clumps and trees.....	30

Larger sizes are charged in proportion. Where large evergreens are shipped on "platforms," a suitable charge will be made to cover cost.

All communications should be plainly addressed to
